

Case Study

Craig Gilbert of Zenith was invited by Stuart Gutzenbach, the Site Manager of The Heights Primary School in Caversham, Reading to carry out a site survey for canopies at the school. Stuart wanted a structure that provided a multi-use covered area that could be used all year round for PE and Sports classes. In addition, he wanted to be able to use it for school concerts. The school already had a number of moveable picnic benches that could be placed underneath the canopy when it was not being used for PE or sport. It can now also be used as an outdoor classroom or for outdoor eating.

After surveying the area, Craig quoted for the options of 1 x 9m x 9m or 1 x 10m x 10m Airone Max 175.

Stuart considered the options and chose the larger 10m x 10m Airone Max 175.

The canopy was installed on an artificial grass area adjacent to the school building. The pupils are now getting plenty of exercise under cover, regardless of weather conditions. The benefit for the children is that research states that children who spend time outdoors are generally happier than those who stay indoors. It improves their mental wellbeing and self-esteem and stimulates their imagination.

Stuart and all at the school are delighted with the end result as the structure fits seamlessly into the area.

1 x 10m x 10m Airone Max 175 – The Heights Primary, Caversham
